

Sepacore® Basic / Easy Flash System

Save Time and Money

VALID UNTIL 31ST MARCH, 2018

Increase the efficiency of your flash separation process!

- Are you using open columns to purify your compounds after synthesis or extraction?
- Does your separation need hours or even days?
- Are you consuming several liters of solvents for your purification process?
- Do you wish to improve the purity of your compounds?

Go the first step into controlled separation with BUCHI Sepacore® Easy or Basic flash systems and profit from up to 35% discount!

Item Number	045221	11059792	11059793
Scope of delivery	1 Pump 10bar C-601 1 Pump manager C-610 Cartridge stand Cartridge holder Injection valve	2 Pumps 10bar C-601 1 Pump controller C-615 Cartridge stand Cartridge holder Injection valve	2 Pumps 50bar C-605 1 Pump controller C-615 Cartridge stand Cartridge holder Injection valve
Application	Isocratic purification Basic applications using FlashPure EcoFlex (large particle sizes)	Binary gradient purification General applications using FlashPure EcoFlex (large particle sizes)	Binary gradient purification Complex applications using FlashPure Select (small particle sizes)

Switch from open columns to BUCHI prepacked FlashPure cartridges using the Sepacore® flash systems. Benefit from:

- Time saving: no self-packing needed, reduced run times due to higher resolution
- Money saving: reduced solvent consumption
- Improved safety: minimized solvent exposure
- High flexibility: access to a wide range of FlashPure cartridges for basic to complex applications

This offer is valid until 31st March, 2018.
